ABSTRACT

A sheet excellent in antistatic properties, transparency and impact strength, and a formed product thereof. The sheet is made of a resin composition

5 comprising an elastomeric styrene polymer and component (B) in a mass ratio of from 98/2 to 80/20, wherein the elastomeric styrene polymer comprises styrene monomer units, (meth)acrylate monomer units, etc., and component

10 (B) comprises (B1) an amino carboxylic acid having at least 6 carbon atoms, a lactam, or a salt of a diamine with a carboxylic acid, having at least 6 carbon atoms, (B2) at least one diol compound and (B3) a polyether ester amide having a C₄₋₂₀ dicarboxylic acid copolymerized.
